

1. When did you wish you had participated more? What keeps you from participating more in class?
2. Are you proud of the work you have completed and the projects we've done this semester?
3. What are your goals for your life after your time at HTHCV?

1. I wish I had participated more when they were showing the pictures that some of us took in the field trip and we had to share how we took the picture and why. I was very nervous because all the team was listening and I didn't have an idea of what to say my main problem when im talking to other people in english its that I don't feel comfortable speak in it. I think mostly it's because I'm not very good at my english and I don't want to get embarrassed and I know people don't "judge" but I just hate not being understood it makes me mad and stressed ,also because sometimes I think some of my ideas don't make sense or like they are not very good.

2. I'm proud that I got to meet everyone in my cohort and that I have the confidence to ask them questions or ask them for help at the beginning I was shy and I only talked to dario and sofia because they were the only one that spoke spanish and because I already knew who they were I'm also proud that I was able to make a website by my self and that most of the time I didn't need a reminder.

- 

3. My goals are that when I get out of high school I can be fluent at my english and that I can have a conversation without using spanish, also going to a good college where they have experience in neurosurgery because that's the career that I want to study, and also take photography classes because people are telling me I'm good at taking pictures and that I have the "eye".
